

Karachi Road Construction Project

A fictional sample tender pack for API testing.

PROJECT IDENTIFICATION

12 km of road construction and rehabilitation in Karachi, Sindh, Pakistan.

—

FIELD	SUPPLIED DETAIL
Client named in sample	National Highway Authority
Reference	NHA/PROC/2026/047
Submission deadline	15 October 2026, 5:00 PM Pakistan Standard Time

Submission channel, briefing arrangements, drawings, quantities, standards, and contract particulars remain to be confirmed in a complete fictional procurement pack.

PROMINENT NOTICE
FICTIONAL DOCUMENT — FOR API TESTING ONLY

This is not an actual tender, government procurement notice, solicitation, award, or legal notice. No affiliation, endorsement, logo, seal, signature, or official status is asserted.

Invitation to Tender

Qualified construction contractors are invited, within this fictional sample, to prepare technical and financial proposals for the 12 km Karachi road works project. Proposals should demonstrate a controlled approach to construction, rehabilitation, safety, testing, and handover.

—

TENDER INFORMATION	SUPPLIED DETAIL
Title	Karachi Road Construction Project
Tendering entity named in sample	National Highway Authority
Reference	NHA/PROC/2026/047
Location	Karachi, Sindh, Pakistan
Road length	12 km
Type	Tender
Deadline	15 October 2026, 5:00 PM Pakistan Standard Time

Details to be confirmed

The fictional issuing office must confirm the submission channel, briefing or clarification schedule, delivery protocol, and any final tender instructions before issue. No submission route is established by this sample.

This page describes a fictional invitation only. It does not create an actual procurement opportunity or agency instruction.

Project Overview and Scope

The fictional project covers construction and rehabilitation of a 12 km road section in Karachi, including associated civil, drainage, traffic-management, safety, quality, and closeout activities.

WORK PACKAGE	PRINCIPAL ACTIVITIES	EVIDENCE / OUTPUT
Preparation	Site preparation, coordination, sequencing, and protection of road users.	Approved method and work sequence.
Road works	Road rehabilitation and asphalt pavement work.	Completed pavement work and quality records.
Drainage	Drainage improvements connected to approved outlets.	Installed works and inspection evidence.
Safety systems	Road markings, traffic signs, and road safety measures.	Approved layouts, installation records, and checks.
Quality and testing	Inspection, testing, material records, and corrective action.	Test results and closed records.
Closeout	Site cleanup, orderly handover, and transfer of project documentation.	Handover dossier and accepted site condition.

Project information still to be confirmed

Exact chainage, drawings, quantities, existing-condition data, access arrangements, and site constraints are not supplied. A real procurement pack would need to establish these items before tender issue.

Technical Requirements

Requirements are stated at a performance level. Contractors must coordinate the work against approved design information and the applicable requirements identified in the final project package.

01 Verify conditions and sequence

Verify site conditions, interfaces, access, and sequencing before works begin and coordinate activities to protect road users.

02 Work to confirmed design

Carry out rehabilitation and asphalt works to approved drawings, specifications, mix designs, and applicable standards identified in the complete project package.

03 Maintain intended drainage

Complete drainage improvements so intended flow is maintained and connections are made to approved outlets shown in confirmed design documents.

04 Install visible safety systems

Provide durable markings, traffic signs, and safety measures to approved layouts and applicable requirements.

05 Record quality evidence

Submit inspection and test plans, material records, test results, nonconformance and corrective-action records, and handover documentation.

ACTIVITY	INSPECTION / TEST EVIDENCE	APPROVAL POINT
Asphalt and pavement works	Material records, inspections, and test results.	Acceptance limits to be confirmed.
Drainage improvements	Installation checks and outlet verification.	Approved design confirmation.
Markings, signs, and safety	Layout check and installation record.	Approved safety arrangement.

Eligibility and Tender Submission

Applicants should show that they can resource, control, and document the proposed works. The final issuing office must confirm registration bodies, thresholds, delivery protocol, and signing requirements.

ELIGIBILITY AND QUALIFICATION

- Relevant construction experience and comparable project references.
- Qualified technical staff appropriate to the proposed works.
- Suitable construction, paving, drainage, and testing equipment.
- Evidence of financial capacity to deliver the contract.
- Company and contractor registrations, valid where applicable.

Specific issuing bodies and thresholds remain to be confirmed.

SUBMISSION REQUIREMENTS

- **Technical proposal:** methodology, program, staffing, equipment, quality, safety, and experience.
- **Financial proposal:** priced schedule or BOQ in the final issued format, with taxes and assumptions itemized.
- Company profile, registrations, financial evidence, references, and authorized contact details.
- Separate, clearly labeled technical and financial packages.

Deadline stated in this sample

Submissions must be received by **15 October 2026 at 5:00 PM Pakistan Standard Time**. The final fictional tender instructions must confirm late-submission treatment, delivery method, number of copies, signing rules, and envelope or file protocol.

Evaluation Criteria and Project Timeline

The supplied weighting separates technical capability from price. Detailed scoring rules and the delivery program remain incomplete pending confirmed tender and contract documents.

EVALUATION COMPONENT	WEIGHT
Technical Proposal Methodology, resources, quality, safety, and relevant experience.	60%
Financial Proposal Priced proposal in the final issued format.	40%

Detailed scoring subcriteria, minimum technical threshold, and price evaluation method are not supplied and must be confirmed before issue. No award decision or procurement rule is implied.

01 Tender issue and clarification Dates to be confirmed.	02 Submission deadline 15 October 2026, 5:00 PM Pakistan Standard Time.
03 Evaluation and award Schedule to be confirmed.	04 Delivery and handover Mobilization, site preparation, construction, testing, and handover durations to be established in the final contract.

Commercial Terms, Contacts and Declaration

The items below identify what a final tender and contract would need to state. No commercial value or duration is created by this fictional sample.

COMMERCIAL TERMS

- Contract form, price basis, payment milestones, taxes, securities, insurance, retention, liquidated damages, variations, defects period, and dispute resolution: **to be stated in final documents.**
- Proposals should disclose assumptions, exclusions, validity period, and applicable taxes; validity duration is to be confirmed.
- Commencement and completion dates depend on an executed contract and approved program.
